

UNY's Sustainability Action Policy

Universitas Negeri Yogyakarta (UNY) has established its sustainability and climate action policy through [Rector Regulation No. 16 of 2021 on the Green Campus](#). This policy defines a green campus as a pollution-free environment that is clean, healthy, and comfortable, and emphasizes that sustainability is a shared responsibility of all university stakeholders.

The regulation outlines key climate actions, including biodiversity protection, waste management, and efficient use of resources such as electricity, water, and fuel. It also promotes environmentally responsible behavior and the use of recycled materials.

In addition, UNY has established an energy management framework that focuses on improving energy performance, increasing renewable energy use, implementing smart building technologies, and promoting energy-efficient procurement.

Overall, this policy reflects UNY's strong commitment to sustainability and its transition toward a low-carbon and environmentally responsible campus.
